

**Pakistan Journal of Nuclear Medicine**

The archives of Pakistan Journal of Nuclear Medicine (PJNM) are now also available on the website of Pakistan Institute of Engineering and Applied Sciences (PIEAS) within the page of "PIEAS Official Publications" (<http://pjm.pieas.edu.pk/>). The official journal of PSNM is in the sixth year of its production and since June 2016 it is being published by the Department of Medical Sciences of PIEAS. It is gratifying that despite of being a small community of professionals, nuclear medicine physicians in Pakistan consistently publish their research work. The intake of original articles and other contributions for PJNM is also steadily increasing from inland and abroad. With this potential we anticipate that the journal which is published annually, may switch to multiple issues per annum in the near future.
